Education

University of Wisconsin - Green Bay

B.S. in Computer Science | Green Bay, WI

Expected May 2026

Technical Skills

Languages: Python, TypeScript, Java, JavaScript

Tools/Platforms: Claude Code, Codex, GitHub, Twilio, Jira, GCP, Docker

Frameworks/Technologies: REST APIs, FastAPI, Next.js, Node.js, Prisma, PostgreSQL

Concepts: AI workflow automation, prompt engineering, system integration, QA automation

Experience

AnSer

AI Engineering Intern | Green Bay, WI

May 2025 – Present

- Built an internal applicant tracking system with automated screening calls, candidate message tracking, and Microsoft Bookings integration to streamline recruitment workflows
- Developed 15 automated QA scripts for human agent performance evaluation, using LLM-based scoring across 20,000 calls
- Built and presented enterprise voice-agent demos using Vapi and ElevenLabs to showcase client-specific conversational AI solutions

Housing and residential education, UW – Green Bay

Front Desk Assistant | Green Bay, WI

October 2023 – May 2025

- Assisted students and parents during housing and application-related inquiries
- Coordinated after-hours emergency dispatch communication for campus housing
- Resolved resident concerns and provided front-desk operational support

ATS at University of Wisconsin Green-Bay

ATS Technician | Green Bay, WI

January 2023 – October 2023

- Provided frontline technical support for classroom and faculty technology issues
- Performed routine room technology checks to maintain reliable teaching environments
- Managed checkout and support of campus technology equipment

Projects

Jetter

Swift, SwiftUI

- Developed a mobile app that helps travelers reduce jet lag by recommending the ideal sleep time based on the flight schedule
- Built the MVP around simple user inputs and streamlined decision logic to generate a clear, lightweight mobile experience

Portfolio Project

React, TypeScript, Vite, FastAPI, OpenAI, Pinecone

- Built a full-stack portfolio platform with a React frontend and FastAPI backend
- Implemented retrieval-augmented responses using OpenAI and Pinecone, with input validation, rate limiting and API-layer safeguards.
