PROFESSIONAL SUMMARY

Applied AI engineer experienced in building AI pipeline automations, LLM-based evaluation systems, and full-stack AI applications. Skilled in Claude Code, Railway deployment, PostgreSQL, REST APIs, and GitHub for version control. Proven ability to deliver production-ready AI products and internal automations independently within startup environments.

TECHNICAL SKILLS

Claude Code, GitHub, Railway, PostgreSQL, REST APIs, MCP servers, Python, TypeScript, FastAPI, React, OpenAI, prompt engineering, retrieval-augmented generation, LLM-based evaluation, AI workflow automation

EXPERIENCE

AnSer AI, AI Engineer AI Engineering Intern

Green Bay, WI

June 2026 - Present
May 2025 - May 2026

- Delivered AI products from prototype through production within a four-person startup-style team, supporting customer demos, deployments, and internal operations.
- Improved grading accuracy across 60,000 calls by contributing to 26 LLM-based performance-scoring scripts.
- Increased recruitment efficiency for 30+ monthly applicants by building and self-hosting a production ATS with LiveKit-powered screening calls, candidate message tracking, secure database tables, a customized Cal.com fork, Cloudflare Tunnel, and Coolify-managed production workflows.
- Built and presented client-specific voice-agent demos using Vapi and ElevenLabs, adding human-in-the-loop routing so callers can transfer to a person at any point.

Housing and Residential Education, University of Wisconsin-Green Bay, Front Desk Assistant

Green Bay, WI

October 2023 - May 2025

- Supported approximately 3,500 residents and resolved 50 weekly housing, application, and operational inquiries.
- Triageed 100+ after-hours incidents per semester and coordinated emergency response with campus dispatch.

Academic Technology Services, University of Wisconsin-Green Bay, ATS Technician

Green Bay, WI

January 2023 - October 2023

- Supported 50+ classrooms and resolved 10+ monthly hardware, audiovisual, and connectivity incidents.
- Maintained 95% classroom readiness through preventive checks and pre-class troubleshooting.

PROJECTS

NicoBot AI Portfolio | *React, TypeScript, FastAPI, OpenAI, Pinecone*

- Built and deployed a recruiter-facing AI portfolio at swedev.online with a React and TypeScript interface backed by FastAPI.
- Built a retrieval-augmented generation pipeline that embeds questions, retrieves verified facts from Pinecone, and generates grounded OpenAI responses.

Jarvis Personal AI Assistant | *Linux, OpenAI, Python, TypeScript, FastAPI*

- Built an event-driven multimodal assistant with wake-word detection, voice interaction, face-based presence tracking, persistent memory, and OpenAI tool calling.
- Developed custom ReSpeaker microphone-array firmware for room-based interaction with a locally deployed Linux assistant.

EDUCATION

University of Wisconsin-Green Bay - Bachelor of Science in Computer Science
